

1.7. NONLINEAR OPTICAL PROPERTIES

Table 1.7.3.3. Classes of refractive-index inequalities for collinear phase matching of three-wave interactions in positive and negative uniaxial crystals

Types I, II and III refer to SFG; the types of the corresponding DFG are given in Table 1.7.3.1 (Fève *et al.*, 1993).

Table 1.7.3.4. Classes of refractive-index inequalities for collinear phase matching of four-wave interactions in positive ($n_a = n_e, n_b = n_o$) and negative ($n_a = n_o, n_b = n_e$) uniaxial crystals with $(n_{b4}/\lambda_4) < (n_{a1}/\lambda_1) + (n_{a2}/\lambda_2) + (n_{a3}/\lambda_3)$

If this inequality is not verified, no phase matching is allowed. The types of phase matching refer to SFG; the types of the corresponding DFG are given in Table 1.7.3.2 (Fève, 1994).
